

Guidance for Uploading EOI Proposal in e-procurement module of CPP Portal

1. The EOI proposal may be scanned with 100 dpi with black and white option which helps in reducing size of the scanned document. Try to avoid to the possible extent in making of pdf files from images.
2. Pdf compressing software tools like smallpdf.com may be used for reducing size of pdf files and compressed bid documents may then be cross checked in all respects.
3. Increasing of JRE memory (procedure appended).
4. To modify the parameter, double click under the "Runtime Parameters" column and, type –
 - Xms512m - That assigns 512MB memory for the Java.
 - Xms1024m - That assigns 1GB memory for the Java.
 - Xms2048m - That assigns 2GB memory for the Java.
 - Xms3072m - That assigns 3GB memory for the Java, and so on.Please note, it begins with a minus sign and ends to an m. Also note, there is no blank space between characters.
5. Using of machine with large RAM (8 GB and above) with good Internet connection/speed.
